

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method in a computer system for evaluating security of a facility having buildings, the method comprising:
for each building of the facility, providing information describing characteristics of the building;
providing calculation rules that indicate how to calculate values for a building based on the characteristics of a building;
providing a compliance rules for security requirements for determining, based on the ~~provided information~~calculated values, whether a building complies with that security requirements;
for each building of the facility,
applying the calculation rules to calculate values, based on the characteristics of the building,
applying the ~~provided compliance~~ rules to determine, based on the ~~provided information~~calculated values, whether the building complies with the security requirements; and
displaying to a user a map of the facility along with an indication of whether a building complies with the security requirements.
2. (Original) The method of claim 1 wherein each building that complies the security requirements is highlighted when displayed.
3. (Original) The method of claim 2 wherein the highlighting is the displaying of the building in green.
4. (Original) The method of claim 1 wherein the building complies the security requirements when it meets each security requirement.

5. (Original) The method of claim 1 wherein the applying of the provided compliance rules indicates whether each security requirement for a building is adequate or inadequate.

6. (Currently Amended) The method of claim 5 wherein the applying of the provided rules also indicates whether a security requirement for the building that is inadequate has been mitigated.

7. (Original) The method of claim 1 including receiving from a user a selection of a building and displaying to the user provided information for the selected building.

8. (Original) The method of claim 1 including receiving from a user a selection of a building and displaying to the user an indication as to whether the building complies with each security requirement.

9. (Original) The method of claim 1 including receiving from the user additional information on a building and reapplying the provided rules to determine, based on the provided information, and the additional information whether the building complies with the security requirements.

10. (Original) The method of claim 1 including receiving from the user an indication of whether a security requirement of building that is inadequate has been mitigated.

11. (Original) The method of claim 1 wherein characteristics of a building relate to windows, doors, and walls of the building.

12. (Original) The method of claim 1 wherein the characteristics of a building relate to use of the building.

13. (Original) The method of claim 1 wherein provided information is derived from map information of the facility.

14. (Cancelled)

15. (Original) The method of claim 1 wherein the facility is a military installation.

16. (Original) The method of claim 1 wherein the facility is a campus of a nonmilitary organization.

17. (Original) The method of claim 16 wherein the nonmilitary organization is a company.

18. (Original) The method of claim 1 wherein the displayed map includes road information.

19. (Original) The method of claim 1 wherein the displayed map includes parking information.

20. (Original) The method of claim 1 wherein the displayed map includes facility perimeter information.

21. (Original) The method of claim 1 wherein the displayed map includes mitigation information.

22. (Currently Amended) The method of claim 1 ~~wherein~~ including allowing a user to relax a security requirement may be relaxed to assist in evaluating the benefit of complying with the nonrelaxed security requirement.
